

ZINC

THE BUILDING BLOCK OF SUMMER FUN!

For many people, summer brings back memories of classic zinc-based sunblock, but that's certainly not the only way zinc contributes to summer fun. Zinc is still a key component in sunscreen, but it's also used in a variety of summer essentials that you will encounter as you enjoy the great outdoors—in your backyard and beyond.

In your backyard:

From toys to swimming pools, zinc is almost everywhere you look when you are spending time in your backyard, including:

Garden tools

Patio furniture

Swimming pools

Children's toys

Swing sets

Garage doors

Fences and gates

Roofing materials

Storage sheds

And beyond:

If you plan to venture beyond your yard, zinc gets you where you need to go safely and efficiently. It's a critical component in:

Electric vehicles

Hybrid cars

Jet planes
